

UVUE

TRACK

YOUR CAR'S ULTIMATE PROTECTION

OVER 7000 VEHICLES IN AUSTRALIA ARE STOLEN EVERY WEEK

Thieves today are bold, tech-savvy, and dangerous. They're breaking into homes to steal car keys — and using signal scanners to start vehicles without making a sound. If your car only has an immobiliser, it's not enough. Some criminals will even come back inside to get your phone or PIN to override the system.

That's why UVUE recommends installing a hidden GPS tracker directly in your vehicle. These trackers are discreet — thieves won't be looking for them, and won't even know they're being tracked.

If your car is stolen, don't confront the intruder. Leave the keys somewhere accessible and let them take it. Once it's gone, alert the police — and let UVUE help recover your vehicle quickly and safely.

Outsmart the criminals.
Protect your car and yourself with UVUE.

INTRODUCING **UVUE TRACK**

PROVIDING A SAFETY NET USING 4G GPS TRACKERS
COMBINED WITH A UNIQUE "TRACK MAP" APPLICATION
WHICH OFFERS AN INSTANT OVERVIEW OF WHERE YOUR
VEHICLES ARE AT ALL TIMES.

**UVUE TRACK WILL PROVIDE YOU WITH GREATER
FREEDOM, SECURITY AND PEACE OF MIND!**

TRACK MAP

ALL ON ONE SCREEN!

Powered by MBG Track Map

No more swapping from one app to another. You can have multiple UVUE trackers ALL on the same map for simplicity and time efficiency (paramount in an emergency)!

FEATURES & BENEFITS

SOS Function

Hit the button and it will instantly alert your support network so you can be found straight away. UVUE Track secures your car AND protects you personally.

Rules Engine

Our unique feature allows you to fully customise your tracking experience! Add your own rules, triggers and notification options (sms/email).

Real Time Tracking

Locate your vehicle exactly when you need it.

Boundary Alerts

You can set multiple geo fences (safe zones and 'no go' zones) and be alerted the instant one is breached.

No charging required

Automatic charging via car battery

Email/Text Alert Notifications

For triggers including low battery, power disconnections, device detachment (about to be stolen).

Fleet overviews

'Track Map' allows you to see your entire fleet on one screen!

4G LTE Network

All of the UVUE GPS trackers operate using 4G ensuring the best coverage available!

Speed Monitoring

View and set alerts for past and real-time speed of the vehicle.

Location History

3-months of stored location history – look back over to discover a pattern of behaviour.

Low monthly fees

Makes it the affordable choice.
